EXPERIENCE

Tech Lead, Legacy Marketing Partners

Chicago, IL — March, 2014 - Present

Managed all server architecture, maintained digital assets and code revisioning software, as well as architect software created by the team. Also managed front end and back end freelancers brought in to complete projects.

- Spoke at EventTech in Las Vegas about two in-house creations built at Legacy -- the [Twitter Vending Machine](#) and the Hilton Social Connect Lounge
- Developed the new corporate [Negra Modelo website](#)
- Built many Android and iOS field applications for brand ambassadors to use for CRM and other data capturing

Tech Lead, DraftFCB

Chicago, IL — August, 2013 - March, 2014

Helped design, architect and code all software from the UX stage to the completion of the project. Also involved in using Omnigraffle to document and graph all the moving pieces to each digital environment used by the team.

- Visually documented the entire digital environment
- Maintained client websites/services
- Helped design the reward program website and Facebook application for Discover Card

Senior Developer, DraftFCB

Chicago, IL — September, 2010 - August, 2013

Developed many sites and applications for multiple clients, both front end and back end. Maintained servers, MySQL and PostgreSQL databases for each project.

- Built and maintained the [Kenworth](#) and [Peterbilt](#) Parts and Service websites
- Maintained the [TRP Parts website](#)
- Developed microsites and landing pages for clients like Tombstone, Discover Card, Cox Cable, AMC's The Walking Dead, Del Monte Chili, EA Games
- Developed an internal employee directory application that tied into the corporate LDAP

EDUCATION

Northern Illinois University

Dekalb, IL — 2004 - 2007 — Theoretical Computer Science
